Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. **Claims 1-5 and 7** are rejected under 35 U.S.C. 103(a) as being unpatentable over Techter et al. 5,010,651 in view of Welner 4,205,572

Techter et al. discloses a circular saw having the claimed elements that include a housing, a motor a saw blade; and the depth of the of a cut may be adjusted by manipulating the footplate that swivels relative to the saw assembly. Techter does not specifically disclose decoupling the assembly from handling forces that act on the saw blade. Weiner discloses a saw blade retainer and kickback clutch assembly that decouples the forces that act on the saw blade so as to preclude the occurrence of damage to the tool and operator. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have made Techter's apparatus to have a retainer and kickback clutch assembly that decouples the forces that act on the saw blade as taught by Weiner so as to preclude the occurrence of damage to the tool and operator.

Claims 6 and 8-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Techter in view of Welner and in further view of Smith 7,255,144.

Techter as modified is described above. The modified Techter does not disclose a ball and detent to isolate the vibration forces. Smith discloses an apparatus that implements a ball and detent configuration to isolate vibration forces in order to maximize the efficiency of the cutting operation. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have made the apparatus of the modified Techter to implement a ball and detent configuration to isolate vibration forces in order to maximize the efficiency of the cutting operation.

Response to Arguments

3. Applicant's arguments with respect to claims 1-10 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to ALVIN J. GRANT whose telephone number is (571)272-4484. The examiner can normally be reached on Mon-Fri 8:00-4:30.
